

COMP1950 :: HOMEWORK 02

OBJECTIVE Write Semantic HTML5

REQUIREMENTS Write a page that describes three or more places you have been (countries, restaurants, etc). Make an effort to engage the user's interest in these places by including the following for each:

- Text descriptions, authored by you
- Images
- Links to related resources
- Include a score out of 10 to indicate your enthusiasm for the place (eg: 1/10 if you hated it, 7/10 if it was pretty good). Investigate the HTML5 tags **progress** and **meter**, then choose one of them to display your score.

The page must use semantic HTML throughout, and must also demonstrate at least 6 of these HTML5 tags:

header, nav, section, article, aside, main, figure, figcaption, footer

This page should be different than your homework #1 page: do not reuse the CSS styles or the layout from the previous homework.

Ensure your COMP1950 hub page navigation 'HTML5' option is linked to this homework.

SUBMISSION **Assigned:** Session 2

Due: 11:59pm the night before Session 3
