COMP1950 :: HOMEWORK 01

OBJECTIVE   Build and publish a homepage to serve as a hub for all your COMP1950 work. Demonstrate your current level of skill with HTML and CSS

REQUIREMENTS   Publish your COMP1950 homepage at this URL:

bcitcomp.ca/students/yourname123/index.html

Replacing *yourname123* with your COMP1950 student folder name

Your homepage must include:

- A prominently displayed and well styled navigation for your subsequent COMP1950 work. It must include options for the following homework:

   - HTML5, CSS, Layout, Responsive Layout, jQuery, Server-side, Templates

   The navigation links can use **href="#"** initially. You can update the URLs as your later homework comes online   Should include at least 1 image

- Your name / nickname

- Some biographical information about yourself, your interests.

- Links to some of your favorite websites and online resources, including descriptions of why they are favorites.

- CSS applied externally (no inline or embedded CSS)

- Demonstration of CSS #id and .class selectors, pseudo classed hyperlinks

- A non-static, CSS styled layout coded by you (no templates)

- No Javascript or server-side scripting.

NOTES   The following are requirements for **all** COMP1950 work:

Text files (.html, .css, .js, etc) must include a comment with the author's name.

All HTML files must include the following code somewhere on the page:

validate

HTML must be semantic. HTML and CSS code should be syntactically, logically, and structurally valid. Code must be well tabbed and readable. Files of different types should be organized into subfolders (images, css, etc)

SUBMISSION   **Assigned**: Session 1   **Due**: 11:59pm the night before Session 2

Homework must be published to *bcitcomp.ca* before the due date.
